Speaker: Wayne Breitbarth spoke to us about LinkedIn

- LinkedIn is an online networking community geared toward professionals vs My Space which is more social.
- You create a profile which is like "a resume' on steroids"
- You plug in your information so when people search different terms your profile comes up.
- There are 3 degrees of separation
 1. Those you know directly
 2. Those who know those you know directly
 3. And, those who know those secondary people You know???
- LinkedIn is a very powerful networking tool with a more direct connection than cold calling.
